

Scribing Needle

Features

- A**
- Comes with superhard chip
- B**
- Comes with superhard chip
 - Curved needle shape for easy marking of hard-to-see side surfaces
- C**
- Comes with superhard chip
 - Needle can retract for good portability
 - Needle can be replaced
- D**
- Compact and can be stored easily in a tool box
 - Needle can be replaced
- E**
- Needle can retract for good portability
 - Needle retracts by turning body
 - Needle can be replaced

Use

- For scribing on general metal material, plastic, and wood

Specifications

Item Code	78638	78646
Hardness	Tip: HRA*: 90 (+1/-0.5)	Tip: HRA* 90.5
Needle diameter	φ2.5 mm	φ4.5 mm
Material	Body: Iron	Tip: Superhard chip

Item Code	78654	74444
Hardness	Tip: HV1,500 - 1,700	Tip: HRA* 90.5
Needle diameter	φ1 mm	φ3.5 mm
Material	Body: ABS resin Tip: Superhard chip	Body: Brass Tip: Tungsten steel

Item Code	74445
Hardness	Tip: HRA*: 90 (+1/-0.5)
Needle diameter	φ1.8 mm
Material	Body: Stainless steel Tip: Tungsten steel

*HRA (Rockwell Hardness Test): Obtained by measuring the depth of the indentation made when a diamond cone is pressed into the material.

Replacement of Scribing Needle
